

Les nombres de 1 à 10

Activités de tri et de
comptage

Comprendre la notion de quantité implique pour l'enfant de concevoir que la quantité n'est pas la caractéristique d'un objet mais d'une collection d'objets. Toutes les activités de tri et de classement permettent de donner du sens à «aller ensemble» pour différents types de raison et donc à la notion de collection. Ces activités permettent aussi de donner du sens à d'autres concepts : forme, couleur, lien thématique, etc., et donc celui de quantité.
